## EXPERIENCE

### **Jom pipi .Lda, Ribeira Grande, Santo Antão — Store repository**

February 2018 - October 2018

At this job I learned to deal with different kinds of people, and also learned to speak properly with them. As a first job it helps me to increase my responsibility and the ability to deal with a group of people.

### **Ramos Group, Mindelo, Cabo Verde — Tester and System Analyst**

July 2021 - PRESENT

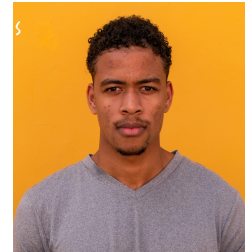

In this work I work as a tester and system analyst where I perform automation and validation tests using Selenium as a tool, and some appropriate tools for proper effect. Being a tester sometimes I end up doing front-end and back-end work if need be.

## EDUCATION

### **Technical University of Atlantic, Ribeira de Julião, Mindelo, Cabo Verde — Software and Telecommunication Engineering**

October 2018 - Present

I still find myself taking my degree, with a forecast of finishing in 2022.

## PROJECTS

### **Personal projects — *Github projects***

To keep myself focused and aware of some technologies I have a couple of personal projects that can be found on my [Github profile](#), which I find myself always working on.

## EVENTS I ATTENDED

### **CVMovel FIG — *CVMovel innovation event 2019***

In this event, the main objective was to present an innovative idea, together with the other participants, in order to win the most innovative project competition. And as a participant, my team and I ended up winning this same contest.

### **Seed's for the Future — *Huawei event for 2021***

That's a program made by Huawei, where the main objective is to share knowledge. As a participant, I end up taking a certificate relative to my participation and also aggregating more knowledge to myself by the contents shared/taught for me and All the participant.
